

Important Update About EcoVeil® Shadecloth Lead Times

QuickShip, our super-fast delivery program, has been extremely successful, providing speedy delivery of our most popular shadecloth series, shade systems, and hardware accessories.

Sometimes, though, our products can be a little too popular.

Due to the overwhelming demand for EcoVeil®, we have had to extend lead times for delivery of certain shadecloths in this series. This is because of a number of factors outside our control, including longer production times and current demand exceeding our supply in our peak season. We are, however, working toward adjusting to the heavy demand.

New lead times for EcoVeil 0950, 1350, and 1550 Series Shadecloths:

- Online Price List orders: 8-10 weeks.
- Proposal estimates and orders: 8-12 weeks.

EcoVeil® Screens

Find Key Info Faster at the New MechoSystems.com

When you're looking for product information, construction drawings, or other key details, you don't want to have to hunt for them. So we're updating our Web site to make it more useful.

We've streamlined our content, optimized our page layouts, and made it easier to find the things you look for most often.

You can see these changes at our new address: mechosystems.com.

To make the Web site more user-friendly, we have:

- Eliminated the Flash platform to make pages accessible with more devices.
- Improved readability for iPads, iPhones, and other mobile devices.
- Switched to text-based menus for easier navigation and translation.
- Incorporated an advanced search engine for faster searches.

Take a look and let us know what you think. We're always adding new information, so if there are other features you'd like to see, please let us know at communications@mechosystems.com.

The screenshot shows the MechoSystems website interface. At the top, there's a navigation bar with links: Home, Why shade?, Gallery, About us, Contact us, Become a dealer, International support, Specifications, Construction drawing. Below this is a main content area with a large image of a modern building interior with large windows and a seating area. To the right of this image are two green boxes: one for EcoVeil® (EcoVeil® is the most eco-effective shadecloth) and one for LEED® (We've won your project before LEED® credits). Below the main image is a 'Shadecloth Solutions box' image and a list of events: NeoCon World Trade Fair Chicago June 13-15, CEDIA Expo Indianapolis September 7-10, Greenbuild Toronto October 4-7. At the bottom, there's a search bar and a footer with the text: 'MechoSystems has been the leading innovator of manual, motorized, and automated solar-shading and room-darkening solutions for more than 40 years.'

Did you know? According to The Costs and Financial Benefits of Green Buildings: A Report to California's Sustainable Building Task Force, an upfront investment of 2% in sustainable building design results in an average life-cycle savings of 20% of total construction costs. That's more than 10 times the initial investment. Our shadecloths and automated shade-control systems fit the bill.
