

Hot off the press

The product-range overview

The new 2010 publication, "WindowManagement® solutions," is now available. It's an illustrated overview of MechoShade Systems' products and systems, including the latest ones such as these:

Manual UrbanShade™ System

Its sleek and refined design, flexibility, low cost, and durability make it a practical and attractive window-covering solution for residential or commercial applications.

Intelligent WhisperShade® IQ™ System

The ultra-quiet motorized window covering is the future of shading technology. Major features are wireless-communication capability, a built-in communication port, and direct-connecting low-voltage IQ™ switches to appreciably reduce wiring costs.

Innovative MechoRF™ C4 2-Zone Interface

The largest application of this wireless solution is in the CityCenter[™] Las Vegas mega-project. The ZigBee[®] PRO-based network can be integrated through the MechoRF[™] card.

SunDialer® WindowManagement® System

The affordable package is a science-based, shade-control program with the power of the elite SolarTrac® system. It continuously and automatically positions shades throughout the day according to the sun's angle and current sky conditions, while retaining a view to the outside.

EcoVeil® Screens 0950 Series

Now available

The new EcoVeil® 0950 Series is now available in the same color range as the original EcoVeil® Screens. The 0950 Series adds a privacy element with a 1% opacity; its slim 1 x 1 weave features a thin construction and a sleek appearance.
