

Dealer Training

Latest developments, innovations, and modifications

Experience an in-class, hands-on, three-day seminar led by highly qualified MechoShade Systems' sales representatives, project managers, and company officers. Learn about the full range of products and services through the Dealer Training program, including:

Daylighting—Uncover WindowManagement® strategies, which maximize natural daylight and minimize energy costs.

LEED®—Understand how MechoShade Systems' window-covering systems can contribute toward a building's LEED® certification.

Shading Systems—Determine the correct procedures for specifying and installing MechoShades® and ElectroShades®.

Configurations—Fully comprehend the advantages of single-banded, multibanded, bottom-up, angled, and SkyLighter® shades.

Shadecloth—Discover the key selling features about MechoShade Systems' extensive range of sunscreens, including their solar properties.

Demonstrations—Engage in hands-on training. Pick up programming and installation tips on the company's latest high-tech systems. Some featured products include the IQ/MLC® and IQ/485®-SMC, utilizing one-way communication; the IQ/485-NI, with two-way communication; and the WhisperShade® IQ™ and I-Con® Systems.

When—Attend one of the monthly Dealer Training sessions. For information regarding session dates, registration, costs, or general inquiries, contact your local MechoShade Systems' sales representative.
